SUMMARY

Aspiring Data Analyst and third-year B.E. student in Artificial Intelligence & Data Science with hands-on experience in Python, SQL, and Power BI. Skilled in building machine learning models, performing EDA, and developing data-driven applications through academic and internship projects. Seeking a Data Analyst job roles and Internship to leverage analytical and problem-solving skills on real-world datasets.

EDUCATION

Bachelor of Engineering (B.E.) in Artificial Intelligence & Data Science **Expected Graduation: 2027**
Marathwada Mitramandal's Institute of Technology, SPPU Pune University *CGPA: 9.05/10*

TECHNICAL SKILLS

- **Programming:** Python, SQL, Java (Basic), C++ (Basic)
- **Data Analysis:** Data Cleaning, EDA, Data Wrangling, Feature Engineering, Statistical Analysis
- **Machine Learning:** Regression, Classification, Model Evaluation, Scikit-learn
- **AI/NLP:** Prompt Engineering, Large Language Models (LLMs), TF-IDF, Cosine Similarity
- **Visualization:** Power BI, DAX, MS Excel, Matplotlib, Seaborn
- **Databases:** MySQL, MongoDB, SQLite
- **Tools:** Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Streamlit, Flask

LANGUAGES

- English
- Hindi
- Marathi

EXPERIENCE

Data Science & Machine Learning Intern (Offline) **Jun 2026 – Aug 2026**
Globe Creator Services LLP, Pune *Kothrud, Pune*

- Working on real-time Data Science and Machine Learning projects under industry mentorship.
- Performing data cleaning, preprocessing, and exploratory data analysis (EDA) on structured datasets.
- Developing machine learning models for prediction and classification tasks using Python.
- Utilizing Pandas, NumPy, Matplotlib, and Scikit-learn for analysis, visualization, and model development.
- Collaborating with mentors to improve model performance and derive actionable insights from data.

Data Science Intern (Hybrid) **Jan 2026 – Apr 2026**
SparkIIT *Work From Home*

- Completed structured training in Python, Data Analysis, and Machine Learning fundamentals.
- Performed data preprocessing, exploratory data analysis (EDA), and feature engineering on datasets.
- Built and evaluated machine learning models using Python libraries.
- Utilized Pandas, NumPy, and Matplotlib for data cleaning, transformation, and visualization.
- Worked on project-based assignments under mentor guidance and industry-oriented learning.

PROJECTS

Slang Text Normalization Web App — Python, Flask – NLP-based web app to convert slang text into standard English using preprocessing techniques. – GitHub: View Project	2025
Weather Forecasting App — Python, Streamlit – Built a Linear Regression model with EDA for weather prediction and visualization. – GitHub: View Project	2025
Movie Recommendation System — Python, TF-IDF – Content-based recommender using TF-IDF and cosine similarity for personalized suggestions. – GitHub: View Project	2024
Alcohol Detection & Vehicle Safety System — Python – Simulated alcohol detection system to control vehicle ignition using threshold logic. – GitHub: View Project	2026
Rock Paper Scissors Smart AI — Python, Tkinter – AI-based game predicting user moves using adaptive learning and pattern analysis. – GitHub: View Project	2025
CRUD Analytics Web App — Python, Streamlit – Built a CRUD-based dashboard with interactive KPIs and data visualization features. – GitHub: View Project	2025

DASHBOARDS & BI PROJECTS

Blinkit Sales Dashboard — Power BI, DAX – Analyzed sales performance and revenue trends, identifying top-selling categories and peak sales periods. – Created KPIs, slicers, and DAX measures to provide actionable business insights. – GitHub Repository: View Project	2025
Uber Rides Analytics Dashboard — Power BI – Analyzed ride demand, peak hours, and time-based trends to optimize driver allocation. – Built interactive dashboards with drill-down features to support data-driven decision-making. – GitHub Repository: View Project	2025

ACHIEVEMENTS

- Maintaining a CGPA of 9.05/10 in B.E. Artificial Intelligence & Data Science.
- Completed multiple IBM SkillsBuild certifications in Artificial Intelligence and Large Language Models.
- Completed two Data Science internships with hands-on Machine Learning projects.
- Built 8+ Data Science, Machine Learning and Power BI projects.

HACKATHONS & ACTIVITIES

- **Smart India Hackathon 2024 – Participant**

Developed a Drug Inventory & Supply Chain Tracking System using Python and Streamlit with inventory monitoring and expiry alerts.
- **Smart India Hackathon 2025 – Participant**

Created a Digital Carbon Footprint Tracker with Power BI and SQL dashboards to visualize and analyze emission data.
- Participated in hackathons focused on data analysis and problem-solving using Python.
- Collaborated with teams to analyze datasets and present analytical solutions under time-constrained environments.

PROFILES

- GitHub: github.com/Samrudhi-J07

PROFESSIONAL LEARNING & CERTIFICATIONS

- Honeywell AI & Machine Learning Program
- Augmented & Virtual Reality Acceleration Bootcamp – FutureSkills PRIME (MeitY & NASSCOM) in association with C-DAC Pune
- IBM SkillsBuild – Getting Started with Artificial Intelligence
- IBM SkillsBuild – Mastering the Art of Prompting
- IBM SkillsBuild – Large Language Model Basics
- Green Skills and Artificial Intelligence – AICTE & Edunet Foundation
- Data Analytics Job Simulation – Deloitte
- Master Data Science and Machine Learning – GUVI
- Power BI Workshop – OfficeMaster
